You will be notified when OASIS Update is ready!

SUB: OASIS Information Release 11.08

HOW TIME FLIES

How time flies! So much so that we have completely forgotten that in July of 2008 we celebrated our 20th year of operation. We are very grateful to the many clients and friends which we have had the privilege of being associated with during all these years. You can never say it enough: "Thank you for being our friend & loyal client". Without you, we would not be here.

OASIS Update information

We are readying OASIS r2008.11 - actually we should be naming this release 2009 something because with minor exceptions during the next year, we are not sure how much more can be added to any software system without pricing it out of the market.

OASIS systems from r2004.12 may access from OASIS Main Menu <Help> then "Release Notes" for detailed information.

Please remember that all OASIS releases are 'cumulative' which means that if for whatever reason a client site decided to skip a particular

release, the latest update 'catches' you up with all of the cumulative work accomplished.

Here is a partial list of enhancements. Please review our <Latest Release Notes> document for in depth information.

* EDI - During the past four months we have been working with INTTRA and have added OCEAN Outbound X.12 Edi to the OASIS software system. We are in the latest stages of approval. This will give OASIS client sites the ability of transmitting Ocean Shipping Instructions \ B/L's to participating carriers.

* AES - Have added code to OASIS in order to automatically intercept AES ITN number. Users have ability of automating process by following our instructions or simply copying fields and inserting into body of B/L. Routed field has also been fixed now.

* C/O - For Cargo originating Ex Canada, Mexico, etc., The Country Of Origin field has been enabled to be modifiable by the OASIS operator.

* IMO - Removed as per request from OASIS customers following line:

{**When required in 9.3 of the General Introduction to the IMDG code *** When required}

* Warehouse Module - Billing Credit Restriction has been implemented down to the MR level in Warehouse module.

* Autoupdate OASIS Feature is being re-enabled through our FTP servers in Tampa, FL.

* Other internal code modifications have been enhanced and too esoteric to describe in layman terms.

OASIS Licensing Changes

OASIS pricing has been constant since 1988. In other words, we have never raised our prices. Only exception was licensing increase of 5% in 2003. Like all businesses, we have also had escalating costs and are finding it necessary to adjust our Licensing & Support fee's by 2%

This is to inform you of the following billing changes:

1. Effective immediately, we are discontinuing the 5% discount offered to Annual & Semi Annual License sites.

.2. A modest increase of OASIS Licensing support fee's of 2% is being activated effective with the December 1, 2008 billing cycle for all OASIS client sites. This increase will range for most OASIS client sites as follows:

OASIS System Value of \$5,000.00 = monthly increase = \$8.33

OASIS System Value of \$10,000.00 = monthly increase = \$16.66

OASIS System Value of \$15,000.00 = monthly increase = \$24.99

OASIS System Value of \$20,000.00 = monthly increase = \$33.32

OASIS System Value of \$30,000.00 = monthly increase = \$49.98

OASIS System Value of \$50,000.00 = monthly increase = \$83.30

As always, we thank you for being our friend & clients and remain with kindest regards,

Sincerely,
Erwin Melzer
