## OASIS 'Ocean Air Shipping Information System'

*White Paper  
by Erwin Melzer  
President & CEO  
Melco Group Intl., Inc.*

### **Concept (in 5 minutes or less...)**

**OASIS** an acronym for 'Ocean Air Shipping Information System' is a software system that manages the day-to-day tasks associated with a busy Freight Forwarding or Export Management company. The entire system operates either from Windows 95 and \ or NT OS. It operates on IBM or fully compatible personal computers. The base system encompasses and fully integrates the following operational tasks.

### **Call & Sales Management**

This module profiles all parties to any given export transaction i.e.: Shipper, Consignee, Carrier, Notify Party and so on.) It captures in addition to address & contact information, phone, e-mail, credit limit and other pertinent information that is automatically utilized and passed on to other OASIS modules, such as Export Documentation and Reporting modules.

It will also pass pertinent information to optional modules such as *AES, Warehousing, Air & Ocean Consolidation, Domestic Air Freight, Inbound De Consolidation, Internet Tracking and Accounting modules*, which may be purchased and added at any time.

- At minimum, it manages & controls all the parties in documentation fields, which are accessible through look-up tables.
- Optimally, the Sales Call module allows for the profiling of detailed call entry with user defined Status, Type Of Call, Sales ID, entry and follow up dates, which can be extracted or recalled by multiple sort orders through a variety of on screen and printed reports.

### **RFQ & Booking Management**

Detailed 'Request For Quotation' and Booking entry screens allow for the entry, recall and reporting of shipment transactions. These act as Transaction Profiles, which can be activated through a rich and intuitive user interface. For example the user defines a transaction as:

- Air, Ocean, Domestic Air Freight
- If it is quoted, booked or cancelled
- Who are the parties to the transaction: Client, Shipper, Consignee, Carrier etc., if known
- Break bulk, if containerized what equipment type, Seal Numbers and so on
- Pieces, commodity description, weights, cube

and other shipment information. Once a quote is activated or a shipment booked, the system passes all previously entered information into its documentation modules. If number of pieces, weight, cube and so on are modified, OASIS automatically recalculates and re displays the information eradicating clerical mistakes.

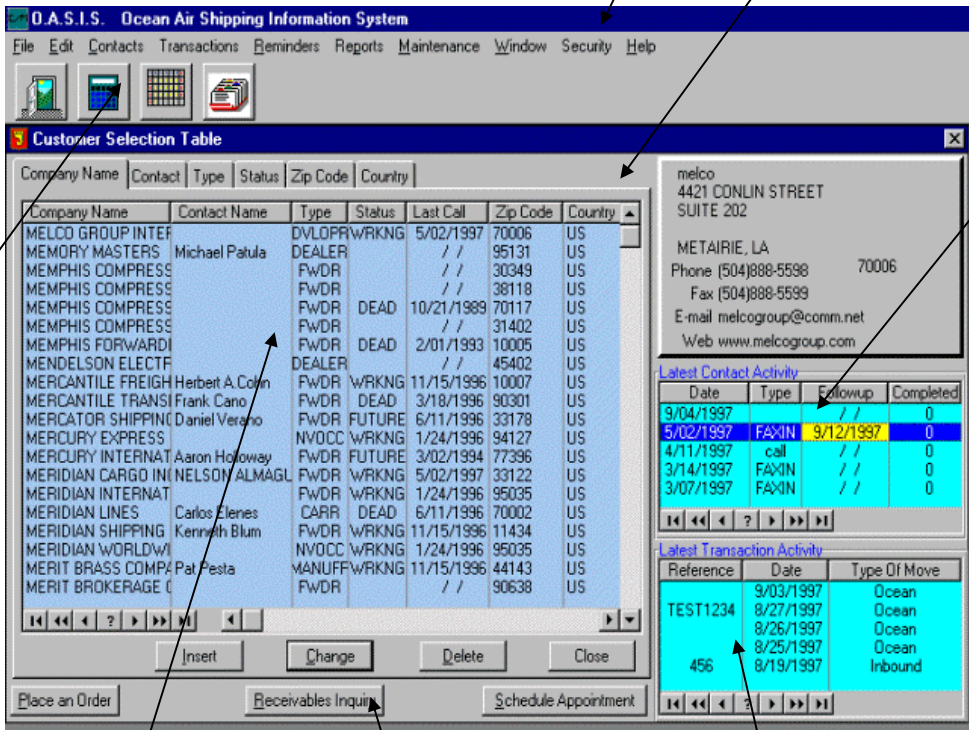

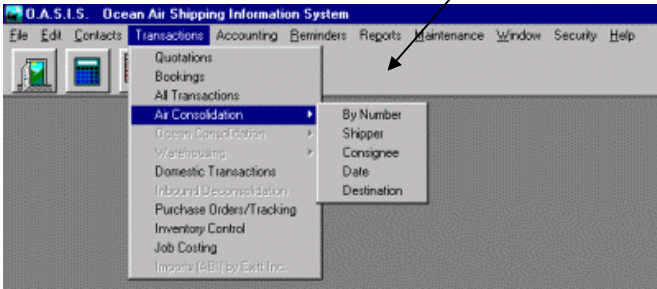

**O.A.S.I.S. w V5.0** 'For Windows™'  
 'Ocean Air Shipping Information System'  
 & Modules

Commence, Profile or retrieve Transactions as Quotes, Bookings & more... AVAILABLE MODULES, which can be added anytime as your company grows, include:

- Warehousing
- AES
- Purchasing & PO Tracking
- Internet Tracking
- Ocean NVOCC
- Air Consolidation
- Domestic Air Freight
- Inbound De Consolidation
- Integrated Accounting w/ payroll

Built in 'state-of-the-art' Security at screen level & user groups. Video & Audio Tutorials with 'Electronic' Reference Manuals available from Help!

Integrated 'Call & Sales Management' module doubles up as the main contact selector in documentation modules

Built in desk top Appointment Scheduling & electronic calculator...

Automatically 'Track' calls by Shippers, Carriers and other contacts with colorized alerts based on time sensitive targets

Retrieve any system 'Contact Record' by Company Name, Contact, Type Of Company, Status, Zip Code, Country...

Mouse 'Point & Click' and GUI 'Graphical User' Interface' simplify system, options and screen navigation...

Latest Shipment & Documentation activity is just one 'mouse click' away...

## Transaction Processing

Multiple sort and access options allow system users to retrieve any previously entered information in an efficient manner. These include but are not limited to client name, booking number, file reference number, carrier name, etc.

Over 22,000 schedules such as Schedule B. Number file (Harmonized Code); Air Freight; Country Codes;

Destination ports; K origin codes; IATA 3 digit World Airports; Currency, SCAC codes are fully integrated into OASIS, making obsolete the need to periodically purchase these reference libraries.

## Documentation Module

OASIS has one of the most advanced documentation engines in the industry. OASIS

generates most of it's own documentation as Laser Forms, eradicating the need and expense of purchasing a multitude of exporting forms. Many forms incorporate your company's logo when appropriate as well as the attractive design with line drawing and shading of the appropriate form body.

All that is required is a Laser or Ink Jet printer such as HP IV, V of inkjet printer such as HP1000c, HP1200 or hundreds of other affordable models from manufacturers such as Epson, Okidata & Brother.

The only forms that may need to be purchased are the AWB (OASIS is formatted specifically to Apperson Business Forms 11" & 12" double six part AWB form) and \ or a Master Bill Of Lading if you wish to utilize a dot matrix format and you require this form to be on continuous, multiple part, pin fed type paper. OASIS however provides several attractively designed laser NVO OBL.

Otherwise, OASIS produces all forms, which include (*but not limited to*) the following:

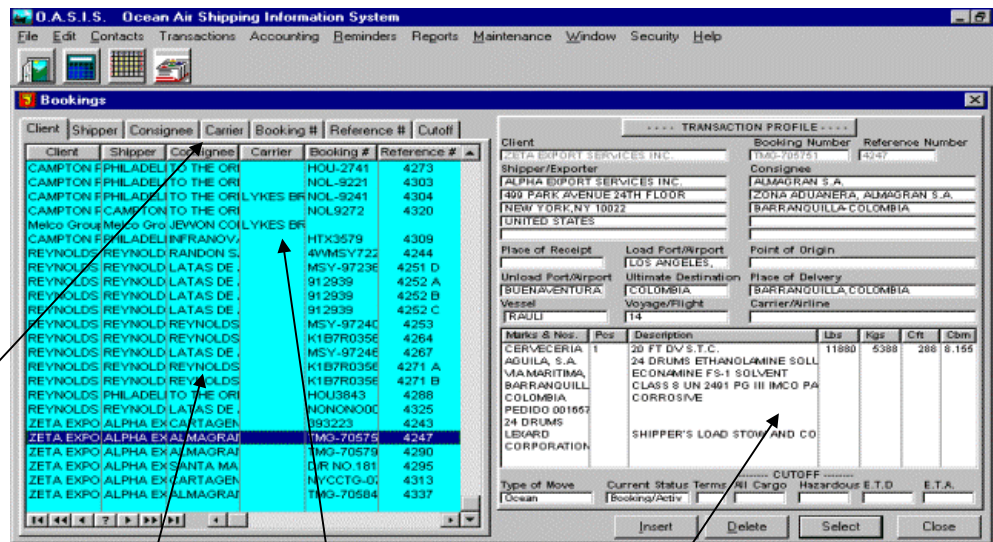

Dangerous Goods	Billing	Packing Lists	Commercial Invoices	Domestic AWB	Transmittal Letters	Certificates of Origin	
S.E.D.s	Bills of Lading	Air Waybills	Sight Drafts	Delivery Orders/Dock Receipts	NAFTA	Caricom Invoices	Alternate BLs

and the following ancillary forms:

Print B/L	Print Dock Receipt	Print Confirmed On Board	Print Cargo Receipt
House B/L	Print B/L Instructions	Print Pre Shipping Advice	Intercargo Insurance.

An advanced capability of the OASIS system is its **Multiple Document Processing** capability. This is available for any OASIS produced document and in essence allows you to split a shipment transaction into multiple mini transactions i.e.: Shipper Export Declaration, Bill Of Lading or Dock Receipt.

The **Model Shipment** function also allows operators to quickly an efficiently copy previously entered transactions, thereby eradicating repetitive shipment entry processing.

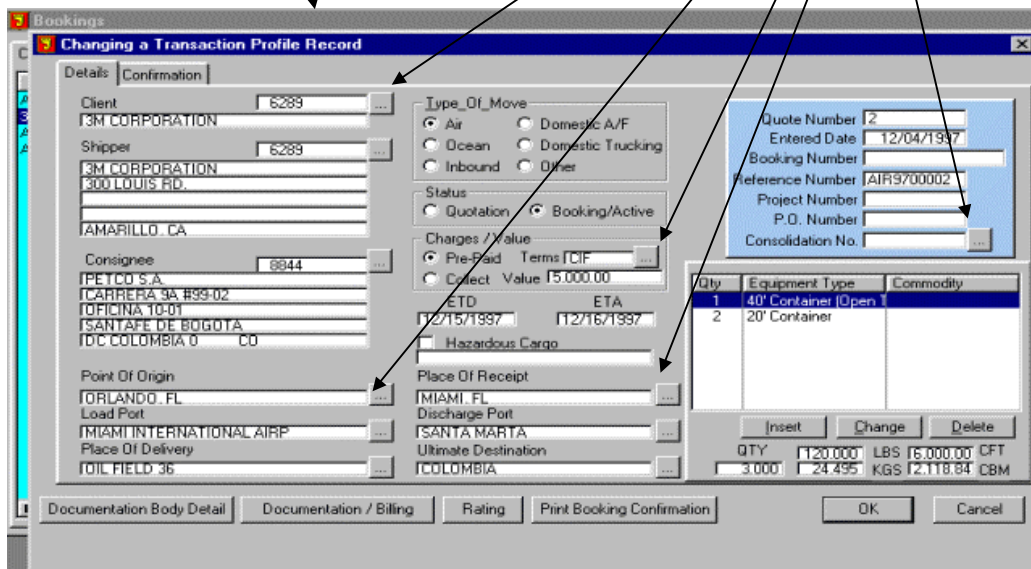

Multiple retrieval & search options such as by Client Name, Booking Number, Reference Number & Carrier are just one click away...

'Highlighted' records enable operators to quickly preview the contents of a particular transaction...

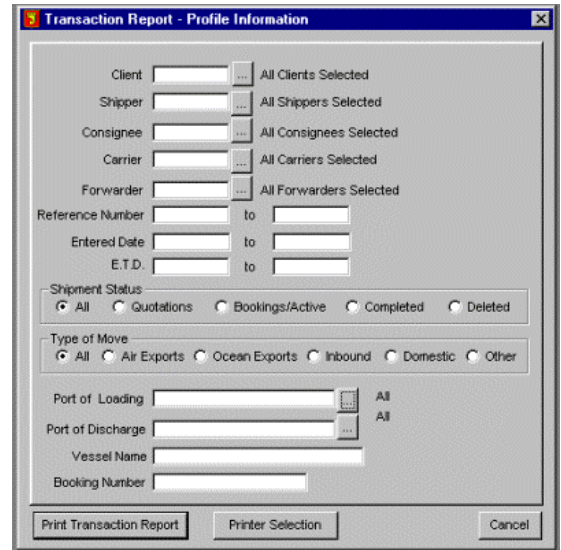

Selecting a highlighted record displays the details pertaining to the particular transaction...

Lookup windows & tables are contained for all parties to transactions as well as over 22,000 schedules with automatic error detection of code numbers...

## Report Module

OASIS harnesses the power of its profiling and documentation modules and parlays on this strength with a rich user interface and multiple, user selectable profiling and sort criteria. All OASIS generated documentation and reports are displayed as previews prior to being able to *be routed to fax boards, printers or MAPI compatible e-mail systems*. Additionally, OASIS allows you to *export* any report as .CSV or 'Comma Delimited' format files which are suitable for viewing in spreadsheet systems such as Lotus123 or Excel. These may also be e-mailed to clients or agents, if required.

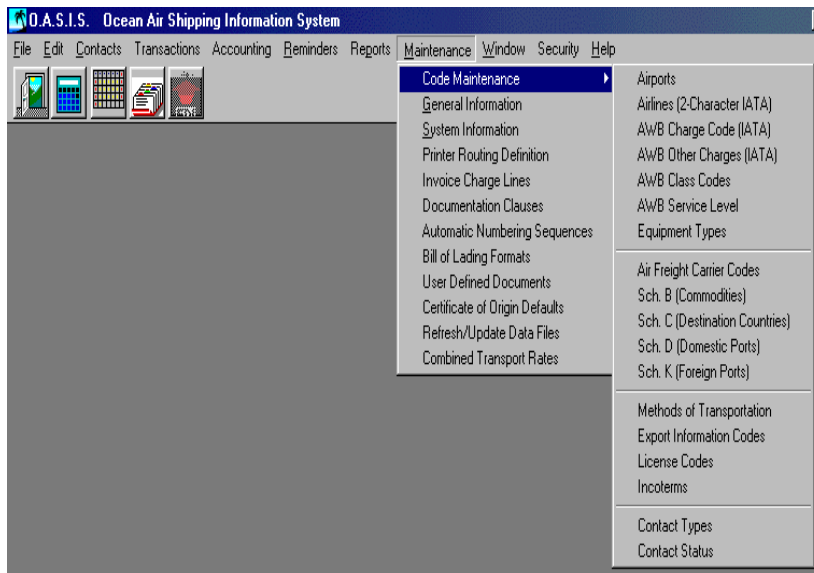

## Maintenance Module

User defined *Automated Number Sequences; Invoice Charge Codes; Specific Document Printer routing; Destination Control Statements; Company & Specific Customer Consolidation Tariff's* and many system control sequences are maintained through the options available in this module.

## Security

The advanced 'Security' options available through the OASIS system are second to none! Access restriction or limits may be imposed on specific individuals, groups of workers; indeed to specific screens and or modules throughout the OASIS environment.

## Help & Tutorials

Melco Group Intl., Inc. is one of the very few companies that dares, indeed 'has' and publishes its entire reference guides on the Internet. The entire reference manual is available from the 'Help' drop down menu as well as seven multi media tutorial lessons that cover the basic system usage from A to Z. Over 60 minutes of comprehensive lessons are contained in the **OASIS** 'Ocean Air Shipping Information System.'

## Additional Modules

A comprehensive and full range of affordable, integrated, state-of-the-art modules, which may be added at any

time (*subject to purchase*), are available with the **OASIS** 'Ocean Air Shipping Information System'. These include but are not limited to:

- Warehousing
- **AES** 'Automated Export System' through the Internet Batch processing method
- **POTrakker** 'Export Purchasing & P.O. Order Entry & Tracking'
- *Purchasing System \* with optional*
- *Inventory Management \**
- *Job Costing \**
- **NVOCC** 'Ocean Consolidation'
- **AFC** 'Air Freight Consolidation'
- **DOMair** 'Domestic Air Freight'

- Inbound De Consolidation
- Caricom \*
- CF7512 \*
- CF7513 \*
- **AccountEx** 'Integrated Accounting w/ GL, Automated Payable Processing, A/R Module, Reporting & Maintenance' modules.
- Payroll processing including California module \*
- **OASISlink** 'Internet Enabled System' & Internet real-time-data tracking
- Full production & hosting of your Corporate Web Site (*available to clients only*)

**\* = under beta testing \ not released**

*\* = Included with basic OASIS system @ no charge!*

### When you consider...

- The combination of an affordable, state-of-the-art transportation software system with its logical and coherent results oriented design...
- Ongoing research & development with timely deployment of 'Quality Control Releases' available 24 hours \ 365 days per year through our corporate web site and direct modem \ e-mail updates to customer sites...
- *Fast, friendly, reliable, capable* technical and customer support...

makes **OASIS**, the '*Ocean Air Shipping Information System*', a logical system software choice **and Melco Group International, Inc.**, *a worthy and trusted partner!*

### So, what is included with OASIS?

**OASIS** an acronym for the "*Ocean Air Shipping Information System*" is the base module and the heart of the freight forwarding \ transportation software system. It is available as a single user or multi-user system in increments of 5, 10, 25 or more users. It is completely integrated; has 'Look Up' tables throughout which speed information retrieval; error checking of Port Codes & Dates and more...

#### **It includes:**

- ⇒ **SalesPro** - a '*Call Management & Sales*' module which allows you to organize all system contacts. You may customize various {Types} of companies such as Shippers, Carriers, Consignees... {Status} such as Active, Quoted, Pending...; set Follow Up Dates and so on. You may enter & edit detailed notes, which can be assigned to Sales Personnel or employees and can be retrieved based on many different criteria such as by 'Follow Up Date' or type of 'Call'. *You don't need to buy 'GoldMine', ACT or other non-integrated call management systems...*
- ⇒ **The Production of Ocean & Air freight documentation** - No need to purchase an air or ocean system... **OASIS combines both!**
- ⇒ **Request For Quotation** - Quickly provide quotes and then follow up on them to turn them into sales...
- ⇒ **Booking Front End** - Organize your shipments by Carrier, ETD, Cargo Cut Off Date, ETA, POL, POD and more...
- ⇒ **Transaction Profile** - Categorize your shipments once. Produce 80% of your documents from this "system organizer"...
- ⇒ **over 22,000 Schedules** A, B, C, D, K, 3 digit IATA World Airports, Carrier Codes, Currency, SCAC Codes etc.,
- ⇒ **LaserPro** - System Laser generated documents. Over 18 different documents such as Dock receipts, IMO Dangerous Goods Declarations, Invoice, Delivery Orders, Sight Drafts, Document Transmittal and more.<sup>1</sup>
- ⇒ **CF7512** - For 'In-Transit' cargo...

---

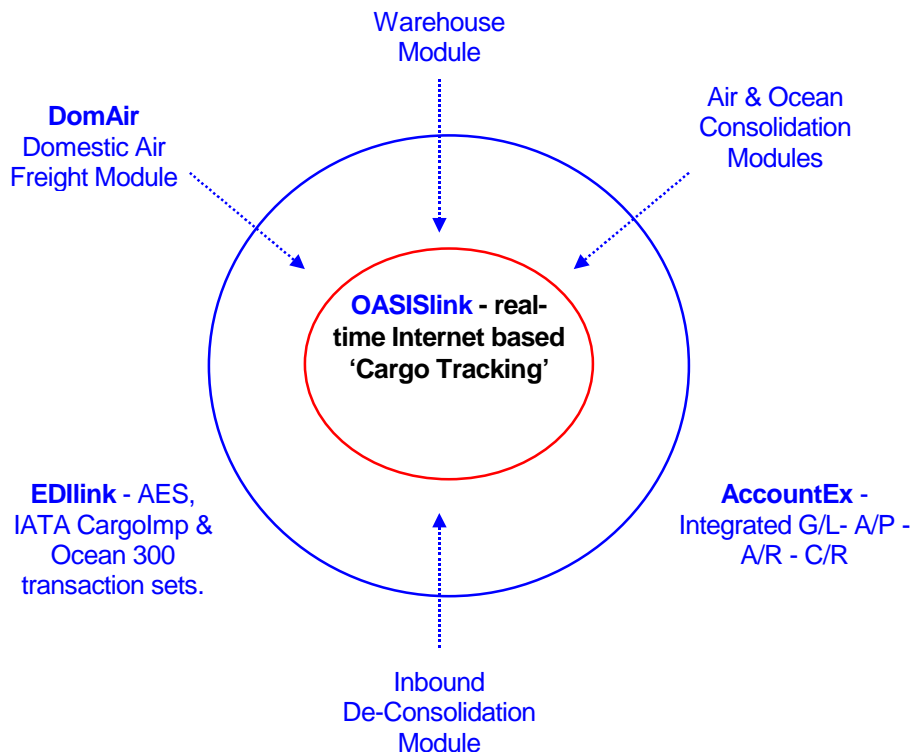

<sup>1</sup> See Document Samples.

- ⇒ **CF7513** - For In bond Cargo...
- ⇒ **CariCom** - For the production of 'Caribbean Common Market' shipments...
- ⇒ **REPORTING MODULE** - Log Reports, Traffic Status, Air Sales Reports, Salesmen Commission Report, AERP Submission Report, Ocean Detail Report, Call Management Reports, Warehousing Reports<sup>2</sup>... all reports include the ability to export the desired data to ASCII \ CSV 'comma delimited Format', faxing from your computer, routed to multiple printers with 'Auto Preview' (see it before you print it)....
- ⇒ **System Maintenance** - This part of the system contains various system interactive **OASIS** databases such as Schedule B. Number files and is where the system Company addresses for the Laser documentation, various system reference numbering sequences, location codes, printer routing, consolidation rate schedules<sup>3</sup> and more are maintained...
- ⇒ **Security Module** - Allows you to restrict users from viewing all or part of certain screens and from accessing certain controls on the screen. Allows you to define your own 'User Levels' & 'Work Groups'...
- ⇒ **Help System** - The entire 'Reference Manual' is accessible from this drop down menu. Includes 'Interactive Audio Visual' movies which serve as a system tutorials...

As your company grows or special services are required, **OASIS** provides a smooth and cost efficient growth path. The following modules<sup>4</sup> may be purchased and added at any time.

## Additional OASIS Modules

**OASIS** is modularized. This means that system modules may be added at any time, preserving the original investment. Also data entered into a particular module i.e.: flows to other modules i.e.: **OASIS** transactions to process & complete shipment documentation or Consolidation modules. The following is a short description of what each module provides.

<sup>2</sup> Requires 'Warehouse Module'

<sup>3</sup> Requires either of the Consolidation Modules.

<sup>4</sup> Requires the purchase of specific module.

**O.A.S.I.S. Ocean Air Shipping Information System**

**Ocean NVOCC & Air Consolidation Module** - These modules may be purchased individually. Multiple search, sort and retrieval options allow you to quickly access transactions. Produces HBL \ HAWB documentation and allows for these transactions to be attached to Master B/L and or AWB's. House transactions may be rated utilizing the **OASIS** consolidation tariff module. Produces Cargo Manifest and Revenue \ Agents Commissions. Links data to OASISlink "Internet Tracking" module...

**Warehouse Module** - Provides the means of organizing W/R 'Warehouse Receipts' in an efficient manner. Multiple search, sort and retrieval options. Produces a Laser W/R Receipt. Allows you to segregate cargo by Destination. Provides for the ability of printing 'Load Guides'. Moves cargo from the Warehouse Module to **OASIS** where W/R receipts may be attached to individual system shipments or consolidations. Links data to OASISlink "Internet Tracking" module. Various report options are available...

**DomAir 'Domestic Air' Module** - The tracking management system allows for the entering of "domestic" transactions which may be tracked by Pickup, HAWB and Master AWB. Details such as various "Charges" Pre-Paid, Collect, 3<sup>rd</sup> Party; Origin & Destination points; Ready Date, Ready Time, Close Time, ETD, ETA; Service Types and more may be profiled in user friendly input screens. A very "cool" function is the Daily Processing / Tracking function which refreshes transactions every 60 seconds system wide allowing a system supervisor to visualize and monitor "work flow". There is no other system like ours! Links data to OASISlink "Internet Tracking" module...

**Inbound Deconsolidation** - This module in essence allows for Consolidations processed overseas to be split and segregated by consignee. Several retrieval & search options i.e.: Agent reference, MAWB, MOBL, AWB etc. provide quick access to information retrieval. This module produces a combo Arrival Notice & Invoice; Authority to Make Entry, Letter of Instructions; Cargo Release; Delivery Order. Links data to OASISlink "Internet Tracking" module...
